Re: Invitation to the State Trustees for Natural  
Resources to participate in discussions  
regarding Richardson Flat Tailings Site,  
Park City, Summit County, Utah .

Dear Dr. Neilson:

Pursuant to Section 104(b)(2) and Section 122(j) of the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C. §§ 9604(b)(2) and 9622(j), respectively, the Environmental Protection Agency ("EPA") is providing you notice of potential damages to natural resources resulting from releases under investigation by EPA, as well as notice of potential negotiations with parties who may be responsible for such releases. The notice is provided to ensure appropriate coordination of assessments, investigations, and planning and to provide an opportunity for natural resource trustee involvement in potential settlements of CERCLA liability.

EPA is sending this notice early to encourage active and timely participation of the natural resource trustees, hopefully ensuring the most efficient use of government resources. The timing of this notice is indicative of EPA's desire to employ an involved team approach in addressing potential public health and environmental threats that may be found to exist at the Richardson Flat Tailings site.

The Richardson Flat Tailings site covers approximately 160 acres in a small valley 1½ miles northeast of Park City, Utah. <sup>The</sup> One source of hazardous substance on site is a tailings dam and associated materials from the Keetley Ontario mine and other mining operations owned by United Park City Mines (UPCM). ~~Another contamination source is floodplain tailings west of the tailings pond on the banks of Silver Creek.~~ UPCM completed some work at the Richardson Flat Tailings

site in the early 1990's, which included covering some of the tailings pond. EPA conducted a removal assessment at the site in 1992 and the site was proposed to the National Priorities List in February, 1992.

Because this Site is presently in the site investigation phase, available data pertinent to a particular agency's concerns may be limited. EPA is currently in the process of reviewing the existing data about the Site, and discussing additional data needs including watershed areas, which may developed for recreational and residential use by UPCM or others. EPA and the Utah State Department Of Environmental Quality have entered into informal talks with UPCM in regard to the site and future development plans. Additionally, in the near future EPA and the State anticipate conducting negotiations with UPCM and other Potentially Responsible Parties (PRPs) aimed at entering into a Remedial Investigation Feasibility Study (RI/FS) Order. Following completion of the RI/FS work or when information allows, a decision on how best to address Site cleanup will be made.

Enclosed is the Site Administrative Record index. Inquiries are encouraged and technical concerns should be directed to the site Remedial Program Manager, Jim Christiansen at (303) 312-6748. Enforcement inquiries may be directed to Matthew Cohn, Site Attorney at (303) 312-6853 or Greg Phoebe, Technical Enforcement Program, at (303) 312-6466.

Sincerely,

Sharon L. Kercher, Director  
Technical Enforcement Program

---

This is a current list of administrative record documents for Richardson Flats. It is important to note that because the situation regarding the site has changed so much in the past year, EPA has opted to begin a new administrative record for the site. This new AR has not yet been established, but will be in the immediate future. Some of these documents will be transferred to the new AR, some will not. However, all listed documents will remain public access unless already stipulated otherwise. The listed documents provide a good base of historical knowledge regarding the site which can serve as a basis for future collaboration.
